

Lesson 3 — Partial Simulation

Session 3 of 8 | **Duration:** 60 min | **Artifact:** 90-sec walkthrough of the risks & watch-points beat

Purpose

Drill the risks & watch-points beat — the language-densest segment, where most B1 speakers run into trouble.

Phases

| Time | Phase | Trainer does |
|-----------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0:00-0:05 | Warm-up | Revisit the five-beat structure on screen. Show the language bank from L2. |
| 0:05-0:20 | Brief the segment | Hand out the L4 day brief (preview below). Today learners do only the risks & watch-points beat — 90 seconds. |
| 0:20-0:35 | Planning | Each learner notes their 2-3 risks and the matching mitigations. Language bank visible. Each risk must be paired with a mitigation owned by a named team — never named alone. |
| 0:35-0:55 | Performance | Each learner records a 90-sec risks-only walkthrough for the same brief. |
| 0:55-1:00 | Close | One observation on language: where the risk-mitigation pairing held; where it broke. Save recordings. |

Scripted teacher language

“You’re not doing the full briefing today. Only the risks and watch-points. 90 seconds.”

“Every risk gets a mitigation, and the mitigation has an owner. Never name a risk alone. “There’s a risk of X” is not enough — pair it with “to manage, security will Y.””

“Language bank stays visible. Use the phrases.”

Day brief — risks beat only

Site: Diriyah Arena, event night

Day: Saturday — first major event since the arena opened. 5,000-capacity sold-out concert. Tier-1 international artist.

Preview: Doors 18:00, show 20:00, finish 22:30. Concourses fully booked for the F&B pre-show window. Backstage VIP zone needs additional security (tier-1 talent, larger entourage than standard). Post-event ride-share crush expected — Riyadh inbound traffic for late departures. Weather forecast: light rain, 60% probability after 19:00 — uncommon in November, drainage and walkway slipperiness are open questions. Half the ushering team is new — onboarded two weeks ago.

The segment: Walk through the risks & watch-points beat only. 90 seconds. Name the top 2-3 risks. Pair each with a mitigation and a named owner.

Between-session work

No homework. The full L4 day brief will be handed out next session for fresh reading.

Artifact

90-sec recording per learner, risks beat only. Save as *Diriyah_[Asset]_[LearnerID]_OpsBriefing_L3_YYYY-MM-DD*.
